

Kunal Deshpande

Software Engineer

Computer Science student skilled in full-stack development (MERN), Java, C++, JavaScript, MySQL, MongoDB, and cloud technologies. Proficient in building scalable web apps, REST APIs, and responsive UIs using React.js, Node.js, Express.js, and Bootstrap. Strong in DSA, OOPs, SDLC, Agile, Git, Azure, debugging, and software testing.

WORK EXPERIENCE

Software Developer

SETV Globals

01/2025 - 04/2025

Remote

Achievements

- Developed an AI-driven healthcare web application using React.js, Node.js, and Flask-based machine learning models for disease prediction.
- Streamlined frontend-backend-AI integration to enhance user experience and system performance.
- Designed backend APIs with Express.js and deployed the full-stack solution on Microsoft Azure for scalable cloud operations.

Team Leader

Smart India Hackthon 2024

08/2024 - 11/2024

Indore-Remote

Achievements

- Led a 6-member team to develop a web platform for stamp collectors.
- - Integrated social media and e-commerce features using HTML, CSS, and JavaScript.
- Built a fully responsive interface to enhance community engagement.
- Link of Front-End Prototype - <https://github.com/kunal-deshpande2004/Stamp-Nation>

Front-End Developer

Mentored Project

06/2024 - 08/2024

Indore

Achievements

- Developed the frontend of an insurance web platform, Insureabhi, using React.js and Tailwind CSS.
- Engineered a fully responsive, accessible UI to enhance user interaction, performance, and cross-device compatibility.
- Deployed the platform for live access: insureabhi.vercel.app.

PERSONAL PROJECTS

ViharSutra - AI Travel Planner | (React.js, Node.js, Express.js, MongoDB, Tailwind CSS, AI Integration)

- Developed a full-stack AI-based trip planning platform with secure authentication, trip management, and real-time itinerary generation.
- Integrated AI services to auto-generate optimized travel plans based on user preferences, enhancing user experience and system efficiency.
- Link - <https://kunal-deshpande2004.github.io/ViharSutra/>

Fetus And Organ Detection | (React.js · Node.js · Express.js · MongoDB Atlas · TensorFlow · Keras · OpenCV · Machine Learning · Deep Learning)

- Built a full-stack AI web application for real-time organ detection and fetus growth prediction, integrating TensorFlow, Keras, OpenCV models with a responsive MERN stack interface.
- Developed and trained CNN-based models, created modular REST APIs for AI inference, and designed a dynamic UI for secure image upload, classification, and result visualization.
- Link - <https://github.com/kunal-deshpande2004/CV-Project>

CoolCars - Car Rental Platform | (React.js, Node.js, Express.js, MongoDB, Bootstrap)

- Created a full-stack car rental platform with hourly bookings and a user-friendly UI
- Implemented secure booking logic, car listings, and MongoDB database integration.
- Link - <https://kunal-deshpande2004.github.io/carBooking/>

Sorting Visualizer | (React.js)

- Designed an interactive sorting visualizer using React.js, allowing users to control array size and animation speed to analyze sorting algorithm behaviors.
- Built as an educational tool to help students and learners understand, compare, and visualize popular sorting patterns through dynamic animations.
- Link - <https://kunal-deshpande2004.github.io/Sorting-Visualizer/>

ACHIEVEMENTS

Finalist at Smart India Hackathon 2024 (College Level), ranked top 20 out of 120+ teams for innovation, problem-solving, and impactful solution delivery.

Solved 350+ problems on Leetcode
